

YASH JADHAV

DevOps & Multi-Cloud Engineer | Azure & AWS Specialist

yash.j.devops@gmail.com | +91 7058276087 | Pune, Maharashtra | linkedin.com/in/yash-jadhav-783038330 | github.com/yashjadhav

PROFESSIONAL SUMMARY

DevOps & Multi-Cloud Engineer with hands-on experience provisioning, securing, and automating scalable cloud infrastructure across Microsoft Azure and AWS. Proven expertise in building keyless CI/CD pipelines (Azure DevOps, GitHub Actions with OIDC), managing Kubernetes clusters (AKS), implementing Infrastructure as Code (Terraform), and driving FinOps cost-reduction initiatives saving up to 35%. Proficient in SRE observability (OpenTelemetry, Application Insights), Linux administration, and container security.

TECHNICAL SKILLS MATRIX

Cloud Platforms: Microsoft Azure (AKS, Functions, Key Vault, Storage, VNet, ACR, Monitor), AWS (EC2, S3, VPC, IAM, RDS, SSM Parameter Store, CloudWatch, Route 53)

CI/CD & IaC: Azure DevOps Pipelines, GitHub Actions (OIDC Keyless Auth), Terraform, Ansible, Jenkins, Docker, Helm, Git

Container & Cloud Systems: Kubernetes (AKS, EKS), Docker Compose, Azure Container Registry (ACR), AWS ECR, Nginx, Microservices Architecture

SRE & Observability: Azure Monitor, Application Insights, Log Analytics (KQL), OpenTelemetry, Prometheus, Grafana, AWS CloudWatch, Synthetic Probes

Security & FinOps: Azure Workload Identity, Secrets Store CSI, Azure Key Vault, AWS IAM / SSM Parameter Store, Trivy Vulnerability Scanning, Cloud Cost Optimization

Linux & Networking: Linux Administration (Ubuntu, RHEL), Bash Scripting, Python, CCNA Networking (TCP/IP, Subnetting, VLANs, Routing, Firewalls)

PROFESSIONAL EXPERIENCE

DevOps Engineer / Intern | Setoo Pvt. Ltd., Pune, Maharashtra March 2025 - Present

- Kubernetes & Cluster Management:** Orchestrated microservices on Azure Kubernetes Service (AKS across DEV/UAT/PROD) and AWS, ensuring 99.99% system availability with zero-downtime canary rollouts.
- Keyless CI/CD Automation:** Built multi-stage Azure DevOps & GitHub Actions pipelines using OpenID Connect (OIDC) and ACR digest-verified image promotion, cutting deployment cycle times by 60%.
- Cloud FinOps & Cost Reduction:** Spearheaded FinOps initiatives across AKS node pools and Azure Storage (Blob cool-tiering and eliminating redundant SMB shares), reducing monthly cloud spend by ~35%.
- SRE Observability & Telemetry:** Integrated OpenTelemetry, Azure Application Insights, and Log Analytics (KQL) for automated liveness/readiness probes, reducing Mean Time to Detection (MTTD) by 45%.
- Infrastructure Security & Secrets:** Implemented Azure Key Vault with Secrets Store CSI drivers and Workload Identity, eliminating static credentials from deployment manifests and pipelines.

Technical Training in CCNA, Linux, AWS, DevOps | SevenMentor, Pune, Maharashtra March 2024 - March 2025

- CI/CD & Containerization:** Automated containerized application deployments using Docker, Jenkins, and Ansible, reducing environment setup time from hours to under 10 minutes.
- Cloud & Linux Automation:** Provisioned AWS infrastructure (EC2, S3, IAM, VPC, RDS) and automated system administration, cron jobs, and database backup routines using Bash scripts.

Cloud Computing Intern | Acmegrade, Remote March 2024 - April 2024

- Cloud Infrastructure Standardization:** Standardized cloud configurations and deployment templates across 5 environments, achieving a 25% reduction in configuration errors.

FEATURED DEVOPS & CLOUD PROJECTS

Agentic OS - Enterprise Kubernetes Infrastructure *(Azure Kubernetes Service (AKS), Helm, ACR, Key Vault, Redis, OpenTelemetry)*

- Cloud Infrastructure & Helm:** Architected AKS cluster infrastructure using modular Helm charts, automated pod scaling, and secure Key Vault secret injection for 4 microservices.
- Queue & Cache Architecture:** Configured high-availability Redis caching and BullMQ background worker infrastructure with persistent volume claims, sustaining low-latency message queues.

Automated Support Ticket System - Serverless Cloud Integration *(Azure Functions, MS Graph API, Table Storage, Azure DevOps API)*

- Serverless Event Automation:** Built a 100% serverless event-driven automation platform between Exchange Online and Azure DevOps Boards, eliminating manual ticket creation overhead.
- Idempotency & Cost Efficiency:** Engineered SHA-256 deduplication and durable watermark tracking, guaranteeing zero email feedback loops at an operating cost of under Rs. 20/month.

Neo Check - Containerized Cloud Platform on AWS *(AWS EC2, S3, SSM Parameter Store, Docker Compose, Nginx, PostgreSQL)*

- Containerized Deployment:** Provisioned multi-container production environment on AWS EC2 using Docker Compose and Nginx reverse proxy, automating daily database backup snapshots.
- Cloud Security & IAM:** Enforced least-privilege IAM policies and secured configuration variables via AWS Systems Manager (SSM) Parameter Store, eliminating all plaintext credentials.

EDUCATION

Bachelor of Technology in Computer Science & Engineering Oct 2022 - Aug 2025

V.V.P Institute of Technology, Solapur, Maharashtra | CGPA: 6.84 / 10.0

CERTIFICATIONS & PROFESSIONAL TRAINING

- AWS & DevOps:** Comprehensive Training in AWS Cloud Engineering & DevOps Automation (SevenMentor)
- Networking:** Technical Training in CCNA Routing, Switching & Network Security (SevenMentor)
- Linux Administration:** Professional Training in Red Hat Enterprise Linux System Administration & Automation
- Cloud Computing:** Internship Certification in Cloud Architecture & Deployments (Acmegrade)
